## EDUCATION

- **Technical University Of Kiev**

*Electrical Engineering*

Completed in 2006

- **Makers Academy, London**

*Web development*

Completed in 2015

## WORK EXPERIENCE

### Career break for maternity leave

*March 2021 - Present*

AI took an extended period of maternity leave to care for my daughter until she was old enough to attend nursery school.

### Koine, London

#### Full Stack Developer

*March 2020 - Feb 2021*

As part of my work, I developed applications that assist institutional clients in managing their digital assets with segregated custody. This system seamlessly integrates with top exchanges and OTC trading venues, ensuring safe and efficient trading as well as real-time settlement. My contributions specifically focused on connecting Koine with popular cryptocurrency exchanges such as Kraken and Bitpanda, making it the go-to platform for managing cryptocurrency portfolios. To achieve this, I utilized various programming languages and tools, including JavaScript, AngularJS, NodeJS, ReactJs, CSS, HTML, GitLab, and SQL.

### Stage3Systems, London

#### Full Stack Developer

*Jan 2017 - Oct 2019*

During my time at the company, our mission was to enhance the brokerage processes in the cargo shipping industry. I had the opportunity to work on various projects, including the development of a system for booking and tracking cargo ships globally. Additionally, we created a private communication service that allowed brokers and transport companies to exchange sensitive documents and discuss contracts on a global scale. As we expanded, I assisted in bringing on new clients and building a mobile client for our service. Throughout these projects, I utilized a range of technologies, including JavaScript, ReactJs, Elm, Elixir, CSS, HTML, XCode, Git, and MySQL. To ensure the smooth operation of our platform, we implemented monitoring tools such as Kibana and AWS (EC2, S3, CloudWatch).

### Payfriend, London

#### Junior Frontend Developer

*March 2016 - Aug 2016*

As a Junior Developer, I worked on a platform for social payments. I was part of an Agile team that used Scrum methodology. Day-to-day tasks involved using JavaScript, MeteorJs, ReactJs, React Native, CSS, HTML, XCode, Karma, Mocha, Chai, and Git.

### Freelance

#### Architectural Designer

*Sept 2009 - 2016 Feb*

I have experience in producing sketches, 2D plans, technical drawings, and 3D visualizations for both clients and fellow professionals.
